

# Solenoid Pilot Actuated Valves

503 Series | Zoned Safety Manifold

# numatics®

**Numatics, Inc. is a leading manufacturer of pneumatic products and motion control products.** Our broad spectrum of standard, custom developed products and application components, have made a significant impact on pneumatic innovation as well as pneumatic and motion control technology. Our company has an extensive history of generating innovative concepts and technological breakthroughs. Many of today's standard features in pneumatic technology were industry firsts from Numatics. We continue our innovative approach to product development by developing electric motion control solutions and enhancing our embedded Fieldbus and I/O products to continually meet and solve our customer's application requirements.

**Today Numatics is proud to be a part of Emerson Electric Co.**

Emerson (NYSE:EMR), based in St. Louis, Missouri (USA), is a global leader in bringing technology and engineering together to provide innovative solutions for customers in industrial, commercial, and consumer markets through its network power, process management, industrial automation, climate technologies, and appliance and tools businesses. For more information, visit [www.Emerson.com](http://www.Emerson.com).

**EMERSON™**

## Principle of the Safety of Machinery:

To guarantee the safety and health of persons exposed to the installation, operation, adjustment and maintenance of machinery.

Three key concepts for the design of machinery and their safety functions have emerged from the implementation of the new Machinery Directive 2006/42/EC:

- A risk analysis prior to design
- A particular consideration of the quantitative aspect of the safety functions in addition to the qualitative approach
- The use of performance levels (PL)

## Risk Evaluation:

The manufacturer or supplier of a machine must see to it that a risk evaluation is conducted to determine the health and safety requirements for persons involved in its operation. The machine must then be designed and constructed in accordance with the results of the risk evaluation.

## RISK EVALUATION

### “Good engineering practice + probabilistic calculations”

#### CONSTRUCTION AND RISK EVALUATION OF MACHINES

##### EN ISO 12100

Safety of machinery  
Basic concepts, general principles for design

##### EN 1050 (EN ISO 14121-1)

Safety of machinery  
Risk assessment - Part 1: Principles

Functional and safety-relevant requirements  
for safety-related control systems

##### Functional Safety Aspect

##### EN 60204-1

Safety of machinery, electrical equipment  
of machines - Part 1: General requirements

#### CONSTRUCTION AND RISK EVALUATION OF MACHINES

##### EN/IEC 62061

##### EN ISO 13849-1

Risk related to the  
hazardous event

= Severity of  
damage **S** and

Frequency and/or duration of exposure **F**  
Probability of occurrence **O**  
Probability of avoidance **P**

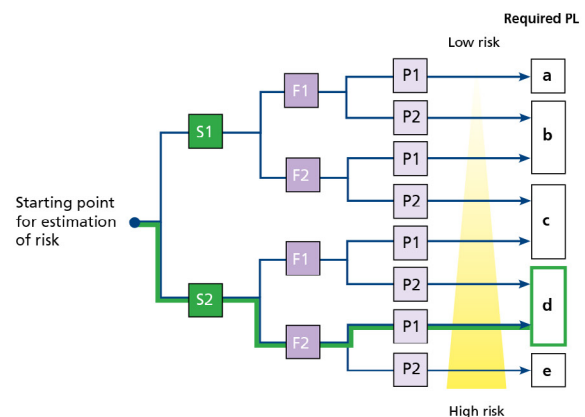

Probability of  
damage

Effects	Severity <b>S</b>	Class <b>K = F + O + P</b>				
		3-4	5-7	8-10	11-13	14-15
Death, loss of eye or arm	4	SIL 2	SIL 2	SIL 2	SIL 3	SIL 3
Permanent, loss of fingers	3	Other measures		SIL 1	SIL 2	SIL 3
Reversible, medical treatment	2			SIL 1	SIL 2	
Reversible, first aid	1				SIL 1	

#### SAFETY INTEGRITY LEVELS SIL 1, 2, 3

##### ANY ARCHITECTURE

- A → Series arrangement w/o diagnostic function
- B → Parallel arrangement w/o diagnostic function
- C → Series arrangement with diagnostic function
- D → Parallel arrangement with diagnostic function

#### PERFORMANCE LEVELS PL a, b, c, d, e

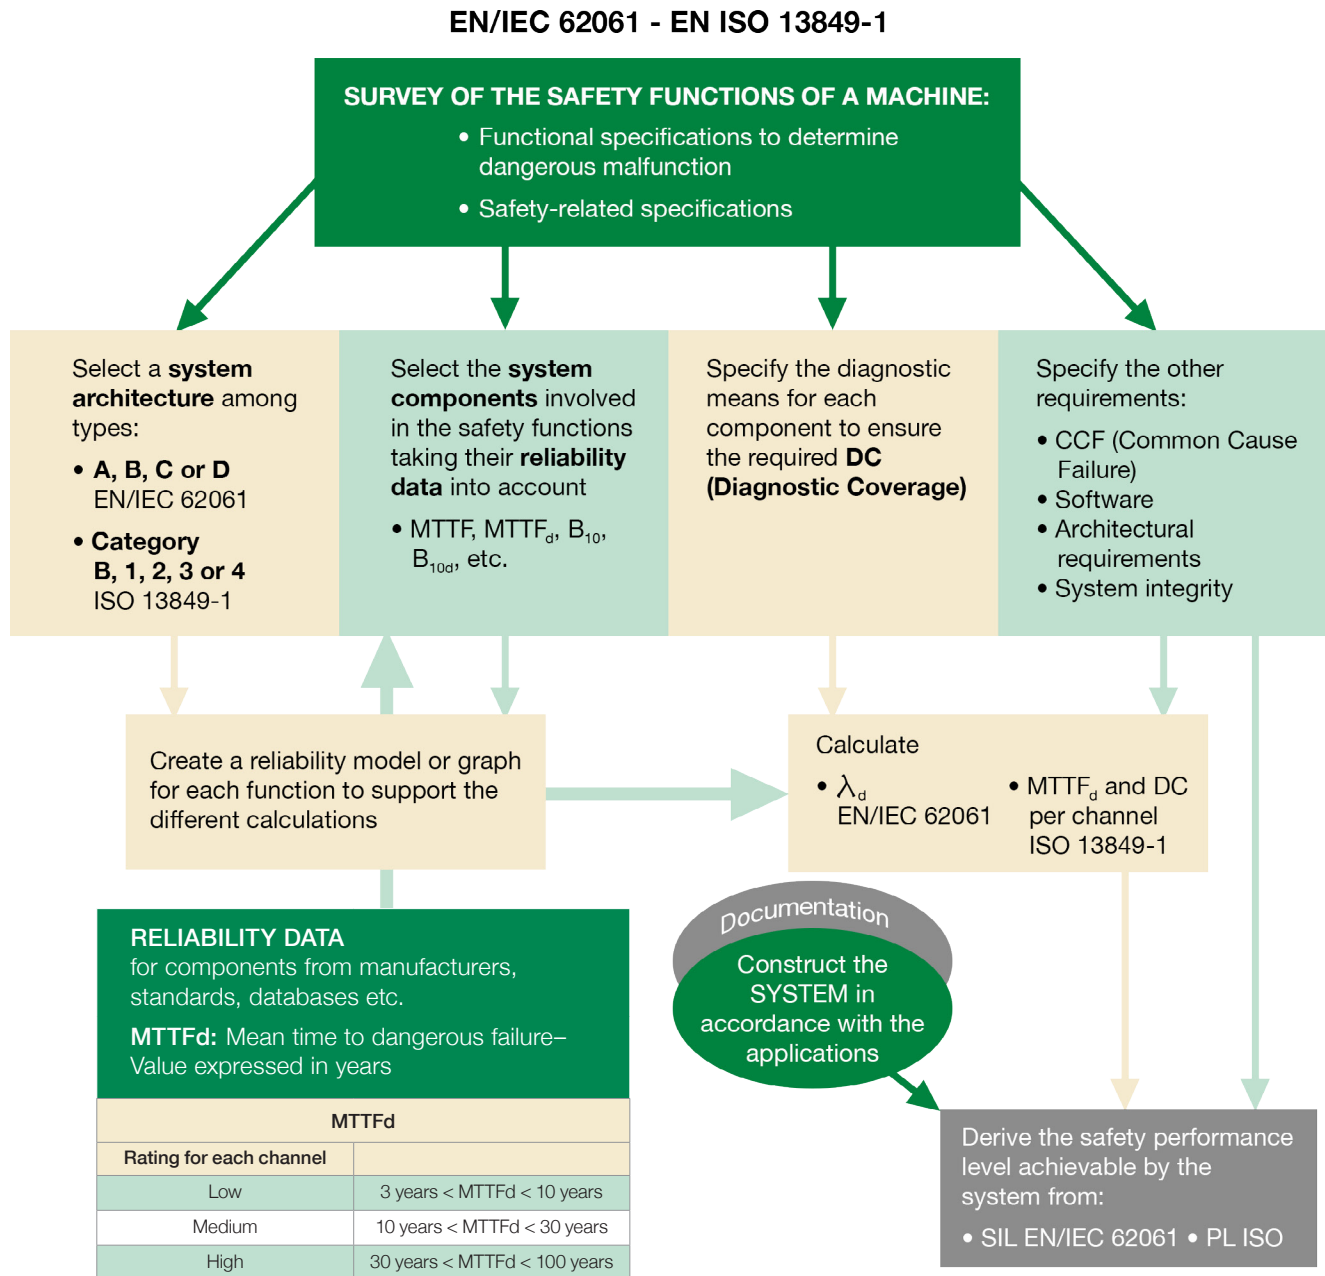

##### DESIGNATED ARCHITECTURE (CATEGORIES)

- B,1 → Series arrangement w/o diagnostic function
- 2 → Series arrangement with diagnostic function
- 3,4 → Parallel arrangement with diagnostic function

## DESIGN PROCESS

### EN/IEC 62061 - EN ISO 13849-1

**B<sub>10d</sub>:** Number of cycles after which 10% of a random sample of wearing components fail dangerously – Value expressed in number of cycles.

**DC:** Diagnostic Coverage

DIAGNOSTIC COVERAGE			
None	Low	Medium	High
DC < 60%	60% < DC < 90%	90% < DC < 99%	99% < DC

**CCF:** Common Cause Failure. Measures to be taken to prevent a given cause (and its effect) from concurrently disabling the multiple channels of a safety circuit.

**Mission time T<sub>10</sub>:** In line with “good engineering practice” as recommended in EN ISO 13849-1, components attaining this value must be replaced (precautionary principle).

Only the pneumatic part is described in the form of a subsystem in these examples. Other safety-related components (e.g. protective devices, electrical logic elements) must be added to ensure the safety function is complete.

The examples shown here only relate to the stopping of hazardous movements. In pneumatics, safety measures concerning the interruption of energy sources, the evacuation of potential energy (pressure contained in a part of the circuit), and a “progressive” start-up after an unexpected shutdown should not be omitted.

### To attain a PL = c, category 1 architecture

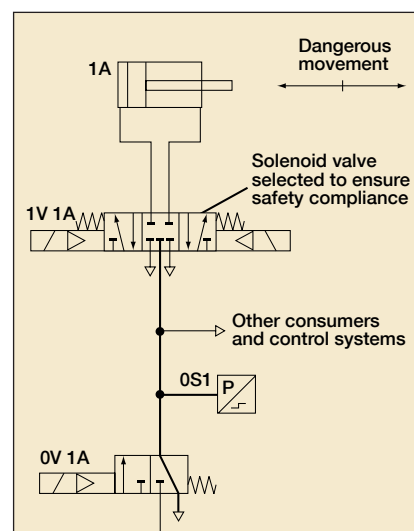

- **Safety function:** Stopping of the potentially hazardous movement of cylinder 1A.
- **Functional description:**

Input 'I': not represented, movable guard or light barrier, etc.  
Logic element 'L': not represented, PLC

- **Calculation of the probability of dangerous failure:**

Safety function	Working hours / day	Working days / year	Cycles / year
1 cycle = 5 s	16 h	240 days	2,764,800 cycles

$B_{10d}$  (1V1A – series 520) = 130,000,000 cycles, i.e. an operating time of 47 years,  $MTTF_D = 470$  years “high”

#### PL Performance Levels

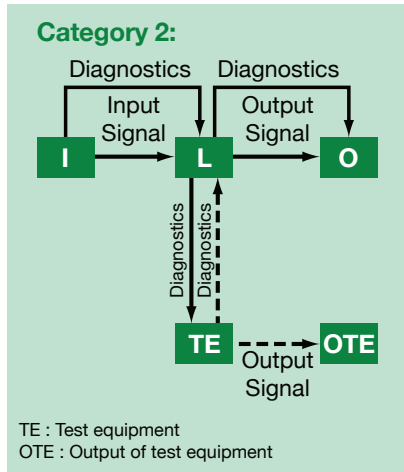

- $MTTF_D$  rating for each channel = low
- $MTTF_D$  rating for each channel = medium
- $MTTF_D$  rating for each channel = high

By limiting the valve's operating time to 47 years, this corresponds to a PL = c

## FUNCTIONS

### To attain a PL = c, category 2 architecture

- **Safety function:** Stopping of the potentially hazardous movement of cylinder 1A.
- **Functional description:**

Input 'I': not represented, movable guard or light barrier, etc.  
Logic element 'L': not represented, PLC

Stop of cylinder ensured by:	Diagnostics ensured by:
Output O: Valve 1V1B	Cross-monitoring in L1 of the supply status coherence of coils 1V1Ba and 1V1Bb and the limit switches 1S1

0V1: Energy isolating valve: ensures the system is exhausted in case of loop failure.

- **Calculation of the probability of dangerous failure:**

Safety function	Working hours / day	Working days / year	Cycles / year
1 cycle = 5 s	16 h	240 days	2,764,800 cycles

$B_{10d}$  (valve 1V1B - series 542) = 44,912,670 cycles, i.e. an operating time of 16.2 ans,

$MTTF_d$  = 162 years "high"

$MTTF_d$  (sensors 1S1) = 45,000,000h, i.e. 11,718 years "high"

The case study shows: DC (Diagnostic Coverage) = 60% "low"

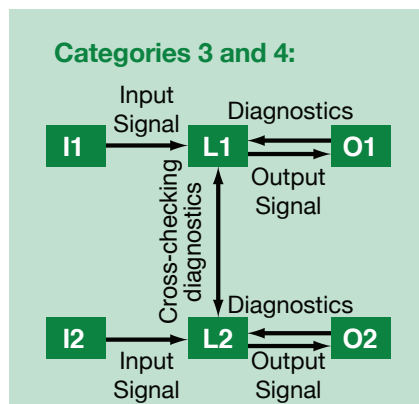

#### PL Performance Levels

- $MTTF_d$  rating for each channel = low
- $MTTF_d$  rating for each channel = medium
- $MTTF_d$  rating for each channel = high

By limiting the valve's operating time to 16.2 years, this corresponds to a PL = c for the safety loop.

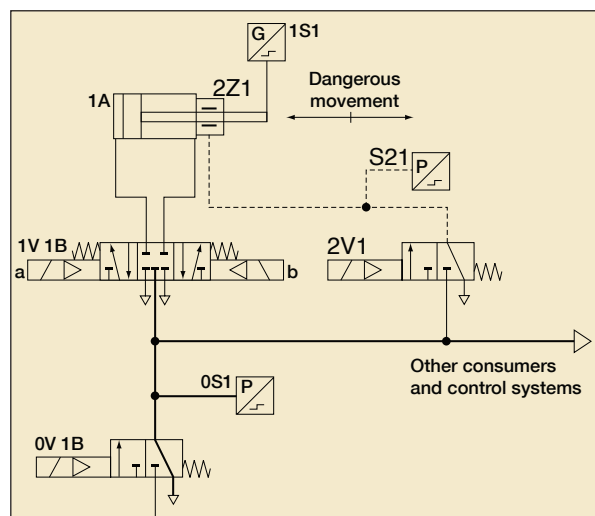

### To attain a PL = d, category 3 architecture

- **Safety function:** Stopping of the potentially hazardous movement of cylinder 1A.
- **Functional description:**

Inputs 'I1' and 'I2': not represented, movable guard or light barrier, etc.

Logic elements 'L1' and 'L2': not represented, PLC

Stop of cylinder ensured by:		
Output O: Valve 1V1B	Cross-monitoring in L1 of the supply status coherence of coils 1V1Ba and 1V1Bb and the limit switches 1S1	Cross-monitoring of L1/L2 status coherence within the PLC
Output O2: Valve 2V1 controlling the rod lock 2Z1	Pressure switch 2S1 for transmission of signal to L2	

0V1B: Energy isolating valve: ensures the system is exhausted.

- **Calculation of the probability of dangerous failure:**

Safety function	Working hours / day	Working days / year	Cycles / year
1 cycle = 10 s	16 h	240 days	1,382,400 cycles

**B<sub>10d</sub> (valve 1V1B - series 542)** = 44,912,670 cycles, i.e. an operating time of 32.4 years, MTTF<sub>d</sub> = 324 years "high"

**B<sub>10d</sub> (valve 2V1 - series 520)** = 20,000,000 cycles, i.e. an operating time of 14.5 years, MTTF<sub>d</sub> = 145 years "high"

**B<sub>10d</sub> (pressure switch 2S1, dynamic rod lock 2Z1)** = 4,000,000 cycles, i.e. a mission time of T<sub>10</sub> = 2.89 years, MTTF<sub>d</sub> = 28.9 years "medium"

**MTTF<sub>d</sub> (sensors 1S1)** = 45,000,000 h, i.e. 11,718 years "high"

**The case study shows:** DC (Diagnostic Coverage) = 60% "low", DC (2V1) = 99% "high", DC\* (2Z1) = 75% i.e. for channel O2, DC = 78% "low"

\* "Good engineering practice" methods associate this type of component with a low-to-medium DC to cover any of the component's drift failures.

#### PL Performance Levels

- MTTF<sub>d</sub> rating for each channel = low
- MTTF<sub>d</sub> rating for each channel = medium
- MTTF<sub>d</sub> rating for each channel = high

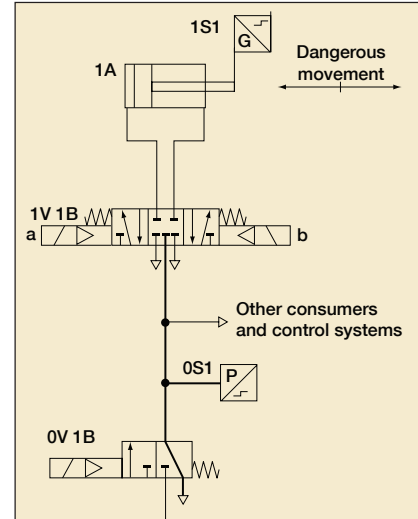

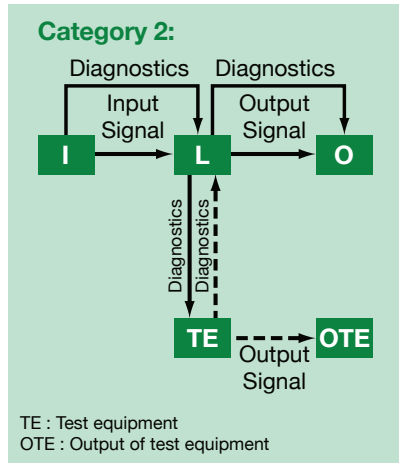

By limiting the operating time of the pressure switch and rod lock to 2.89 years, this corresponds to a PL = d for the safety loop.

## FUNCTIONS

### To attain a PL = d, category 3 architecture

- **Safety function:** Stopping of the potentially hazardous movement of cylinder 1A.
- **Functional description:**

Inputs 'I1' and 'I2': not represented, movable guard or light barrier, etc.  
Logic elements 'L1' and 'L2': not represented, PLC

Stop of cylinder ensured by:		
Output O: Valve 1V1B	Comparison in L1 of the supply status of coils 1V1Ba and 1V1Bb and the limit switches 1S1	Cross-monitoring of L1/L2 status coherence within the PLC
Output O2: Valve 2V1 controlling the two 2/2 "cylinder stop" valves used as braking units	Pressure switch 2S1 for transmission of signal to L2	

0V1B: Energy isolating valve: ensures the system is exhausted.

- **Calculation of the probability of dangerous failure:**

Safety function	Working hours / day	Working days / year	Cycles / year
1 cycle = 10 s	16 h	240 days	1,382,400 cycles

**B<sub>10d</sub> (valve 1V1B - series 542)** = 44,912,670 cycles, i.e. an operating time of 32.4 years, MTTF<sub>d</sub> = 324 years "high"

**B<sub>10d</sub> (valve 2V1 - series 520)** = 20,000,000 cycles, i.e. an operating time of 14.5 years, MTTF<sub>d</sub> = 145 years "high"

**B<sub>10d</sub> (pressure switch 2S1, dynamic rod lock 2Z1)** = 4,000,000 cycles, i.e. a mission time of T<sub>10</sub> = 2.89 years, MTTF<sub>d</sub> = 28.9 years "medium"

**B<sub>10d</sub> (2/2 cylinder stop valves 2V3, 2V2)** = 60,000,000 cycles, i.e. MTTF<sub>d</sub> = 434 years "high"

The case study shows: DC (1V1B)=60% "low", DC (2V1)=99% "high", DC\* (2V3, 2V2)=60%, i.e. for channel O2, DC = 78% "low".

\* "Good engineering practice" methods associate this type of component with a low-to-medium DC to cover any of the component's drift failures.

#### PL Performance Levels

- MTTF<sub>d</sub> rating for each channel = low
- MTTF<sub>d</sub> rating for each channel = medium
- MTTF<sub>d</sub> rating for each channel = high

By limiting the operating time of the pressure switch and rod lock to 2.89 years, this corresponds to a PL = d for the safety loop.

5 Ported, 2 and 3 position, 4-way, Spool & Sleeve and Rubber Seal, Cv: 1.2 - 1.4

- Solenoid air pilot actuated
- Low wattage – 1.7 watt for DC application
- DC solenoids polarity insensitive with surge suppression  
Plug together circuit boards eliminate internal wiring
- Integral recessed gaskets
- IN Fittings to accommodate various tube sizes
- Simple conversion from internal to external pilot
- G3 Fieldbus electronics
- IP65 Certified

## How to Order

### Valve

\* Spool and Sleeve not available with Functions 6, A, D, and N

### Regulator

\* For Regulator Type "E" must select "0" wiring option + "0" interface

**Sandwich Pressure Regulators**

Types: RS / RD / RE / RT

**ISO 15407-2 Interface**

**Proprietary Interface**

**External Outlet Regulator**

**Type RS**

Single pressure from a single supply.

**Type RD**

Dual pressure from a single supply.

**Type RE**

External outlet regulator used with jumper plate for single or dual pressure.

**Type RT**

Two-pressure selector used for multi-pressure applications.

### Valve Regulator / Speed Control Plug-in Assembly

### Regulator Kits and Service Parts

#### Regulator Service Kit

#### Regulator Unit Kits

(includes regulator assembly, gaskets, screws)

Part Number	Description
M503AR428759001	3-30 PSIG Regulator Kit

Dimensions: mm (inches)

### Dimensional Drawing - Plug-in Valve Mounted (X Wiring Option)

A	B	C	D	E	F	G	H	J	K
112.9 (4.445)	44.85 (1.766)	14.15 (0.557)	54 (2.126)	43.65 (1.719)	16.65 (0.656)	148.654 (5.853)	136 (5.354)	42.5 (1.673)	40.5 (1.594)

### Zoned Power Manifold Base (“X” Wiring)

- Via M12 Connector supplies power to up to 16 valve solenoid coils
- All valve solenoid coils are controlled via the attached G3 node
- When M12 connector is externally supplied by a Safety Relay or Safety Output via a Safety PLC the valves within the Safety zone become one of the redundant channels of a Category 3 or 4 circuit

**Dimensions: mm (inches)**

**Dimensional Drawing - Plug-in Valve Mounted (U Wiring Option)**

A	B	C	D	E	F	G	H	J	K	L
112.9 (4.445)	44.85 (1.766)	14.15 (0.557)	54 (2.126)	43.65 (1.719)	16.65 (0.656)	148.654 (5.853)	136 (5.354)	42.5 (1.673)	40.5 (1.594)	13.5 (0.531)

**Pilot Valve Manifold Base (“U” Wiring)**

- Allows mounted pilot valves to be electrically controlled via M12 connector; isolated from the connected G3 node
- When M12 connector is externally supplied by a Safety Relay or Safety Output via a Safety PLC the pilot valves become one of the redundant channels of a Category 3 or 4 circuit
- Pilot supply valves when used to supply Pilot Operated Check Valves, Rod-Locks, Pilot Operated Spring Return Valves etc provide one of the channels required for Category 3 & 4 circuits

- Monitors pressure to external devices by DPS280 Pressure Switch
- Can be use to supply pressure from Port 4 of valve to pilot Safety zone of manifold via Pilot Separation Pilot block
- Vertical and Horizontal orientation of DPS 280 allows for mounting on adjacent stations

PORT 4

Vertical

Horizontal

Part Number	Port for Pilot Supply	Description
8503AU516663005	Plugged	Proprietary Port 4 supply block with Vertical DPS280

	A	B	C	D	E	F	G	H	J
w/Vertical DPS280	212.48 (8.365)	197.21 (7.764)	148.78 (5.857)	58.58 (2.306)	83.55 (3.289)	33 (1.299)	17 (0.669)	30 (1.181)	26.5 (1.043)
w/Horizontal DPS280	236.02 (9.292)	148.78 (5.857)	58.58 (2.306)	169.98 (6.692)	59.51 (2.343)	44.23 (1.741)	33 (1.299)	30 (1.184)	26.5 (1.043)

- Allows for introduction of secondary pilot supply to either an individual valve or zone of valves on manifold. Supply to zone of manifold requires selection of Manifold Block and End Plates with Pilot Separation option
- Pilot Supply air can be from either an external valve or integrated into the manifold via the Port 4 Supply Block

## G3 Fieldbus - Electronics Made Easy!

Innovative Graphic Display is used for easy commissioning, visual status & diagnostics.

### Commissioning Capabilities

- Set network address (including IP & Subnet mask for Ethernet)
- Set baud rate
- Set auto or manual I/O sizes
- Set fault/idle output states
- Set brightness
- Set factory defaults
- Visual diagnostics
- Shorted and open load detection
- Shorted sensor/cable detection
- Low & missing power detection
- Missing module detection
- Self-test activation
- Log of network errors
- Distribution errors

### G3 Fieldbus Communications Electronics

Why use Numatics Fieldbus communication electronics?

#### Modular Reality...

No internal wiring simplifies assembly

- SPEEDCON M12 connector technology allows for fast and efficient ½ turn I/O connector attachment
- Power connector allows output power to be removed while inputs and communication are left active
- IP65 protection
- Up to 1200 Input/1200 Output capability with one communication node! (Present physical I/O combinations allows 1200 I/544 O)
- 32 valve solenoids per manifold up to 17 manifolds per communication node!
- One node supports 16 I/O modules – Analog I/O, Digital I/O (NPN & PNP) and Specialty
- Innovative clip design allows easy module removal/replacement without dismantling manifold
- Auto Recovery Module (ARM) protects configuration information during a critical failure. Allows configuration information to be saved and reloaded to replacement module automatically

#### \*Numatics I/O with SPEEDCON® technology

- 1/2 turn for faster I/O connections
- Backwards compatible with standard M12 cables/connectors
- Meets the same IP/NEMA standards as M12/Micro cables/connectors
- Same cost as standard M12/Micro cables/connectors
- See pages 42 & 43 for cables with SPEEDCON® connector technology.

Graphic Display for Configuration & Diagnostics

Auto Recovery Module

Highly Distributable

Easy, Robust Connections

### Supported Protocols

- Ethernet
- PROFINET®
- Ethernet POWERLINK®
- EtherCAT®
- EtherNet/IP™ DLR w/QuickConnect™
- CC-Link IE Field™

PROFINET is a registered trademark of Profibus Nutzerorganisation e.V.  
Ethernet POWERLINK is a registered trademark of Bernecker + Rainer Industrie – Elektronik Ges.m.b.H.  
CC-Link is a registered trademark and CC-Link IE Field is a trademark of the CC-Link Partner Association.

## G3 Electronics Modularity

### Discrete I/O

The G3 Series product line is a completely modular system. All of the G3 electronic modules plug together, via mechanical clips, allowing easy assembly and field changes. This makes the system highly distributable. Additional flexibility is incorporated because the same modules can be used in either centralized or distributed applications.

The G3 electronics interfaces with the highly modular Numatics 500 Series, generation 2000 Series, ISO 5599/2 and ISO 15407-2 Series valve lines to further enhance the modularity and flexibility of the entire system.

## Ethernet (EtherNet/IP™ & Modbus TCP/IP)

Ethernet used throughout the world to network millions of PCs has now evolved into a viable industrial network. Ethernet is an open architecture high-level communication network that meets the demands of today's industrial applications requiring high-speed (10/100 Mbit/s), high-throughput and flexibility. Additionally, Ethernet technology can integrate an on-board web server, which can make the node readily accessible to any standard web browser for configuration, testing and even retrieval of technical documentation.

Numatics' G3 nodes for Ethernet have an integrated graphic display and are capable of addressing combinations of up to 1200 outputs and 1200 inputs.

The G3 EtherNet/IP™ nodes have been tested and approved for conformance by the ODVA.

More information about EtherNet/IP™ and the ODVA can be obtained from the following website: [www.odva.org](http://www.odva.org).

Description	Replacement Part Number
EtherNet/IP™ communications module (node)	240-181
Modbus TCP/IP communications module (node)	240-292

## Technical Data

Electrical Data	Voltage	Current
Node Power at Max. Brightness	24 VDC +/- 10%	.091 Amps
Valves & Discrete I/O	24 VDC +/- 10%	8 Amps maximum
Power Connector	Single key 4 pin 7/8" MINI type (male)	
Communication Connector	D-coded 4 pin M12 type (female)	
LEDs	Module Status, Network Status and Activity/Link	

Operating Data	
Temperature Range (ambient)	-23 °C to 50 °C (-10 °F to 115 °F)
Humidity	95% relative humidity, non-condensing
Vibration/Shock	IEC 60068-2-27, IEC60068-2-6
Moisture Protection	IP65 (with appropriate assembly and termination)

Configuration Data	
Graphic Display	Display used for setting IP Address, Subnet mask, Fault/Idle Actions, DHCP/BootP and all other system settings
ARM	(Auto Recovery Module) Optional module that contains automatic recovery of system setting in the event of total or partial system failure
Maximum Valve-Solenoid Outputs	32
Maximum Addressable I/O Points	Various combinations of 1200 outputs and 1200 inputs

Network Data	
Supported Baud Rates	10 Mbit/100 Mbit
Bus Connector	D-coded 5 pin M12 type (female)
Diagnostics	Power, short, open load conditions and module health are monitored
Special Features	Integrated web server, fail-safe device settings, HTTP, FTP, and UNICAST (for EtherNet/IP™)

Weight	
Ethernet Communications Module	255g/9 oz.

PROFINET®

PROFINET® is the innovative open standard for Industrial Ethernet, developed by Siemens and the PROFIBUS® User Organization (PNO). PROFINET® complies to IEC 61158 and IEC 61784 standards. PROFINET® products are certified by the PNO user organization, guaranteeing worldwide compatibility.

Numatics' G3 nodes for PROFINET® IO (PROFINET® RT) have an integrated graphic display and are capable of addressing combinations of up to 1200 outputs and 1200 inputs.

PROFINET® is based on Ethernet and uses TCP/IP and IT standards and complements them with specific protocols and mechanisms to achieve Real Time performance.

More information regarding PROFINET® can be obtained from the following website: [www.profibus.com](http://www.profibus.com).

Description	Replacement Part Number
PROFINET® communications module (node)	240-240

Technical Data

Communication Connector	Two D-coded 4 pin M12 type (female)	
LEDs	Module Status, Network Status and Activity/Link	

Operating Data	
Temperature Range (ambient)	-23 °C to 50 °C (-10 °F to 115 °F)
Humidity	95% relative humidity, non-condensing
Vibration/Shock	IEC 60068-2-27, IEC60068-2-6
Moisture Protection	IP65 (with appropriate assembly and termination)

Configuration Data	
Graphic Display	Display used for setting IP Address, Subnet Mask, Fault/Idle Actions, and all other system settings
ARM	(Auto Recovery Module) Optional module that contains automatic recovery of system setting in the event of total or partial system failure
Maximum Valve-Solenoid Outputs	32
Maximum Addressable I/O Points	Various combinations of 1200 outputs and 1200 inputs

Network Data	
Supported Baud Rates	10 Mbit/100 Mbit
Bus Connector	Two D-coded 4 pin M12 type (2-Female)
Diagnostics	Power, short, open load conditions and module health and configuration are monitored
Special Features	Integrated web server, Integrated 2 port switch, fail-safe device settings, and FSU

Weight	
PROFINET® Communications Module	227g/8 oz.

## Ethernet POWERLINK®

Ethernet POWERLINK® is an open fieldbus protocol designed by B&R for communication between automation control systems and distributed I/O at the device level.

Numatics' G3 Ethernet POWERLINK® nodes have an integrated graphic display and are capable of addressing combinations of up to 1200 outputs and 1200 inputs.

The G3 Ethernet POWERLINK® nodes have been designed and tested to conform to the Ethernet POWERLINK® specifications available at EPSG group (Ethernet Powerlink® Standardization Group). The certification process ensures interoperability for all Ethernet POWERLINK® devices and compatible with B&R systems.

More information regarding Ethernet POWERLINK® can be obtained from the following website:  
[www.ethernet-powerlink.org](http://www.ethernet-powerlink.org).

Weight	
POWERLINK® Communications Module	227g/8 oz.

EtherCAT®

EtherCAT® is an open ethernet-based fieldbus protocol developed by Beckhoff. EtherCAT® sets new standards for real-time performance and topology flexibility with short data update/cycle times and low communication jitter.

Numatics' G3 EtherCAT® node has an integrated graphic display for simplified commissioning and diagnostics. It is capable of addressing combinations of up to 1200 outputs and 1200 inputs.

The G3 nodes for EtherCAT® have been designed and tested to conform with EtherCAT® specifications set forth by the ETG.

More information regarding EtherCAT® can be obtained from the following website: [www.ethercat.org](http://www.ethercat.org).

Description	Replacement Part Number

Maximum Sub-Bus I/O Points	Various combinations of 1200 outputs and 1200 inputs

Network Data	
Supported Baud Rates	10 Mbit/100 Mbit
Bus Connector	Two D-coded 4 pin M12 type (female)
Diagnostics	Power, short, open load conditions and module health and configuration are monitored
Special Features	Integrated web server, fail-safe device settings

Weight	
EtherCAT® Communications Module	227g/8 oz.

## EtherNet/IP™ DLR

EtherNet/IP™ used throughout the world to network millions of PCs has now evolved into a viable industry network. EtherNet/IP™ is an open architecture high-level communication network that meets the demands of today's industrial applications requiring high-speed (10/100 Mbit/s), high-throughput and flexibility. Additionally, EtherNet/IP™ technology can integrate an on-board web server, which can make the node readily accessible to any standard web browser for configuration, testing and even retrieval of technical documentation.

Numatics' G3 EtherNet/IP™ DLR (Device Level Ring) node with integrated display has an embedded switch which allows the unit to be used in simplified networks with linear topology configurations (daisy chain). This technology alleviates the need for an external Ethernet switch device in a single subnet configuration. Additionally, the DLR compatibility allows the node to be used in a fault tolerant "ring" network, when using appropriate EtherNet/IP™ DLR scanners. DLR configuration allows communication recovery from a single point failure on the network ring (e.g. failed network connection or cable).

Numatics G3 EtherNet/IP™ nodes are capable of addressing combinations of up to 1200 outputs and 1200 inputs.

The G3 EtherNet/IP™ nodes have been tested and approved for conformance by the ODVA.

More information about EtherNet/IP™ and the ODVA can be obtained from the following website: [www.odva.org](http://www.odva.org).

Description	Replacement Part Number

Weight	
EtherNet/IP™ DLR Communications Module	227g/8 oz.

## CC-Link IE Field™

CC-Link IE Field™ is an open standard 1 Gbps Ethernet Manufacturing network that enables seamless data communication from the plant-level enterprise network to the production floor network. The CC-Link Partner Association (CLPA) oversees and manages CC-Link® specifications.

Numatics' G3 nodes for CC-Link IE Field™ have an integrated graphic display and are capable of addressing combinations of up to 1200 outputs and 1200 inputs.

CC-Link IE Field™ is based on 1 Gbps Ethernet standards and complements them with specific protocols and mechanisms to achieve real time performance.

More information regarding CC-Link IE Field™ can be obtained from the following website: [www.CCLinkAmerica.org](http://www.CCLinkAmerica.org)

Description	Replacement Part Number

## G3 RTD Temperature Module 240-311

The RTD module is for use with RTD (Resistive Temperature Detectors), supporting up to four RTD devices simultaneously. The module supports various RTD types including: Pt100, Pt200, Pt500, Pt1000, Ni100 and Ni1000.

### Technical Data

Electrical Data	
Voltage	24 VDC Module Supply (Via G3 System Aux. Power Connection)
Input Type	RTD (Resistive Temperature Detector), 4 per Module
Supported Sensor Type	Pt100, Pt200, Pt500, Pt1000, Ni100, Ni1000
Supported Temperature Coefficients	.00385; .00392; ....Ω/°C
Resolution	15 bits plus sign
Data Format	Signed Integer
Calibration	Factory Calibrated Field Calibration w/high tolerance (± .005%) 100 ohm and 350 ohm resistors
Input Update (filter) Rate	Adjustable (5-20mS), factory default: 5ms
Accuracy	0.1% of full scale @ 25° C

Mechanical Data	
I/O Connector	M12 4 Pin Female. Speedcon (Compatible with 5 Pin)
Mass	247g/8.7 oz.

Operating Data	
Temperature Range Ambient	-23 °C to 46 °C (-10 °F to 115 °F)
Humidity	95% relative humidity: non-condensing
Ingress Protection	IP65 (with appropriate assembly and terminations)

## 240- 320 G3 [Ex ia] NAMUR Input Module

The [Ex ia] module is for use with NAMUR certified intrinsically safe (IS) sensors.

### Technical Data

Electrical Data	
Voltage	24 VDC Module Supply Sensor Supply = 8.2 VDC Nominal
Input Type	NAMUR
NC (Normally Closed)	Signal Current (0) ≥ 2.1 mA Signal Current (1) ≤ 1.2 mA Short Circuit Monitoring < 100 Ω Open/Broken Wire Detection < 0.05 mA
Safety Parameter Output Maximums	Uo ≤ 9.6 V Io ≤ 13 mA Po ≤ 31 mW
Diagnostics	Open (broken wire) and Short Circuit

Certification	
Module Marking (ATEX)	 II(1)GD [Ex ia Ga] IIC [Ex ia Da] IIIC

Mechanical Data	
I/O Connector	M12 4 Pin Female Speedcon (Compatible with 5 Pin)
Mass	284g/10.0 oz.

Operating Data	
Temperature Range Ambient	-23 °C to 46 °C (-10 °F to 115 °F)
Humidity	95% relative humidity: non-condensing
Ingress Protection	IP65 (with appropriate assembly and terminations)

## Miscellaneous Modules

### Valve Driver Module

Provides connections between the communication module or Sub-Bus valve module and the valve manifold.

### 501, 502 and 503 Series Valves

Description	Part Number
Valve Driver Module	P599AE508827001
Valve Driver Module w/DIN Rail Clips	P599AE508827002

### Right Hand Mounting Cover\*

Used when a communications module is used without local valves installed.

Description	Part Number	Weight
Right Hand Mounting Cover w/DIN Rail Clips	240-290	82g/2.9 oz.
Right Hand Mounting Cover	240-255	71g/2.5 oz.

\* Not for use in combination with ARM Module

## Accessories

For use with Murrplastik® Type 20 Software.

### Labels - 122-1251

Technical Data	
Material	Polycarbonate (PC)
Color	White
Temperature Range	-40 °C to 140 °C (-40 °F to 284 °F)
Label Dimensions	0.19" x 0.39"
Label - Printable Area	0.19" x 0.39"

Dimensions: mm (Inches)

Dimensional Drawing - G3 Fieldbus Manifold Assembly

503 Series Valve Manifold Assembly with G3 Electronics and Sub-Bus Output

## How to Order

### Manifold Assembly

**8 503 A V 3 B 3 0 0 V A00**

**Port Type**  
 8 = NPTF\*  
 G = ISO228/1-G\*  
 K = Push-in Fittings

**Product Series**  
 503 = 26mm Valve

**Revision**  
 A = Initial Release

**Product Type**  
 V = Valve Manifold Assembly

**Electronics**  
 3 = G3 Fieldbus Electronics

**Number of Valve Stations**  
 B = 2      V = 22  
 D = 4      X = 24  
 F = 6      Z = 26  
 H = 8      3 = 28  
 J = 10     5 = 30  
 L = 12     7 = 32  
 N = 14  
 P = 16  
 R = 18  
 T = 20

**Options**  
 A00 = Standard (No Options)  
 MUF = Muffler in End Plates  
 DRM = DIN Rail Mount  
 DWM = DIN Rail with MUF  
 14X = External Pilot Supply from Port # 14  
 D12 = (14X) External Pilot Supply from Port #14 and (MUF) Muffler in End Plates  
 D14 = (14X) External Pilot Supply from Port #14 and (DRM) DIN Rail Mount  
 F06 = (14X) External Pilot Supply from Port #14, (MUF) Muffler in End Plates, and (DRM) DIN Rail Mount  
 A45 = Zoned Pilot for End Plate Assembly Kit  
 D47 = A45 + MUF  
 D48 = A45 + DRM  
 D49 = 14X  
 F21 = A45 + DRM + MUF  
 F22 = A45 + 14X + MUF  
 F23 = A45 + 14X + DRM  
 K30 = A45 + 14X + DRM + MUF

**End Plate Style**  
 V = Vertical

**Second Valve Series**  
 0 = No Second Valve Series

**End Plate Port Size**  
 3 = 3/8  
 4 = 1/2  
 K = 10mm  
 M = 12mm

\* Port Type '8' and 'G' only available in Port Size '3'

### G3 Electronics

**G3 EP1 00 R 0 STD**

**Series**  
 G3 = G3 Electronics

**Electronics Protocol**  
 CC1 = CC-Link IE Field  
 EC1 = EtherCAT  
 ED1 = EtherNet/IP DLR  
 EM1 = Ethernet Modbus - TCP  
 EP1 = EtherNet/IP  
 PL1 = Ethernet POWERLINK  
 PN1 = PROFINET

**Options**  
 STD = Standard  
 DRM = DIN Rail Mounting  
 E40 = Auto Recovery Module (ARM)  
 G32 = E40 + DRM

**Modification**  
 0 = Initial Release

**Left Mounting**  
 R = w/Terminating Resistor

**Number of I/O Modules**  
 00 = 0      09 = 9  
 01 = 1      10 = 10  
 02 = 2      11 = 11  
 03 = 3      12 = 12  
 04 = 4      13 = 13  
 05 = 5      14 = 14  
 06 = 6      15 = 15  
 07 = 7      16 = 16  
 08 = 8

Ordering Zoned Safety Manifolds with G3 Electronics and 503 Valves

Zoned Safety manifolds can be configured with a combination of valves for non safety related applications and up to 3 independent safety zones. Within each safety zone both power and pilot air to the valves can be isolated.

- Any valves that are not part of the safety related functions must be configured starting @ Station 1
- The “U” Wiring block is the beginning of the safety zone. Only 5/2 Single Solenoid /Spring return valves without override may be used. Each valve corresponds to a safety zone. A manifold with 2 Safety zones will have 2 valves with the “U” Wiring
- The “X” wiring block allows 0 and +24 VDC separation for a section of the manifold while the remainder of the manifold remains operational. Each “X” wiring block controls up to 16 solenoids
- If Pilot Zoning is required, must select “Zoned Pilot for End Plate Assembly Kit” in the Valve Assembly number and option “83H” Pilot Separation for Station 1 in the Manifold Assembly Kit
- Refer to the How to Order example to the right

Example Order - 503 Shown

Assembly Kit	8503AV3L300VA45	
Valve Station #1	R503A2B40MA00F1	S T A N D A R D
Valve Station #2	R503A2B40MA00F1	
Mounting #1	8503AMM22MA0010	
Valve Station #3	R503A2B10M11MF1	P I L O T  V A L V E S
Accessory Station #3	K503AU516663006	
Valve Station #4	R503A2B10M11MF1	
Accessory Station #4	K503AU516663010	
Mounting #2	8503AMS22UA010	
Valve Station #5	R503A2B40MA00F1	Z O N E  # 1
Accessory Station #5	K503AP48330010	
Valve Station #6	R503A2B40MA00F1	
Mounting #3	8503AMM22X83H10	
Valve Station #7	R503A2B40MA00F1	Z O N E  # 2
Valve Station #8	R503A2B40MA00F1	
Mounting #4	8503AMM22MA0010	
Valve Station #9	R503A2B40MA00F1	
Accessory Station #9	K503AP48330010	
Valve Station #10	R503A2B40MA00F1	
Mounting #5	8503AMM22X83H10	
Valve Station #11	R503A2B40MA00F1	
Valve Station #12	R503A2B40MA00F1	
Mounting #6	8503AMM22MA0010	
Electronics	G3EP100R0STD
