

## DeviceNet™ Fieldbus Solutions

**Fieldbus Communication  
for DeviceNet™  
Applications**

Lumberg Automation™ Provides  
Reliable DeviceNet Fieldbus Solutions  
for Industrial Automation Applications  
Worldwide.

## Be Certain with Belden

### Belden® Industrial Solutions – More Convenience and Solutions for Networks in Harsh Environments and Large-scale Infrastructures

#### Belden Industrial Solutions

For mission-critical applications, Belden is the signal transmission partner that delivers confidence in signal availability, integrity and performance because only Belden can offer solutions that satisfy any requirement.

A majority of system failures occur within the signal transmission space, and trouble-shooting can be very difficult and time-consuming. We want everyone to "Be Certain" that when choosing Belden you receive **Signal Availability** – always there, **Signal Integrity** – always trusted and secure, and **Signal Performance** – always when and where you need it.

Belden has brought together a comprehensive line of industrial cabling, connectivity and networking devices, offering the most reliable communications solutions for your application. Whether you are networking your devices to the controllers, connecting the controllers to the control room, relaying data between the control room, the engineering department, and remote manufacturing sites – or all of the above – Belden has the products you need to seamlessly connect your communications.

From the petrochemical, automotive, pharmaceutical, power generation, pulp and paper, metals, food and beverage, or general manufacturing plant to the corporate headquarters – and everywhere in between – Belden has your signal transmission solution. Belden offers the most dependable network and communications system performance in tough and mission-critical environments.

#### Our Synergy Ensures Continuous Performance

With the Hirschmann™ and Lumberg Automation™ product line additions to the Belden offering, our line of Complete Industrial Solutions is uniquely positioned to provide the best network and communications infrastructure possible. Belden products and systems expertise means that you can maintain ongoing operations without interruption and costly downtime – in any environment.

Here are a few more good reasons why Belden is your best choice for industrial networking, communications and control:

- We have the expertise to integrate your industrial and commercial networks.
- Our products are engineered to perform in tough and difficult environments.
- We offer the broadest selection of products, for a complete, end-to-end Ethernet solution.
- Our sales and engineering professionals can audit, recommend/design, configure and assemble the products and systems to your specific requirements.
- Our global manufacturing and distribution network make our products available to you globally.

#### Offering Comprehensive Service & Support

Belden recognizes that comprehensive know-how is necessary to ensure an optimized, homogenous solution. We also know that consultation, support and training requires more than just a general understanding of the products, technologies and market trends. It requires a solid understanding of the application and the ability to provide the type of support that is needed – when and where it is needed. It requires the four key service and support areas that are critical to success:

- Network Design
- Training
- Technical Support
- System Performance

#### Network Design

Belden eliminates your design challenges because we understand the issues surrounding the design and operation of networks in industrial and mission-critical environments. Our engineers are available to work with you to deliver high-availability networks that meet your enterprise-wide IT needs. Whether it's designing systems for Greenfield facilities, or integrating into existing industrial IT environments, our highly-trained staff lifts the design burden from your shoulders to ours.

We'll consult with you to develop a strategy – or we'll develop and implement your full design – either way our staff is available to you.

#### Training

Backed by years of meeting and exceeding the needs of a broad range of end-user applications, Belden is ideally suited to offer beginners and networking experts alike the opportunity to expand their understanding of mission-critical industrial networks. Belden has developed a series of training programs that are given by Belden-certified individuals – all experts in industrial networking and cabling.

#### Technical Support

At Belden, our personnel are poised to assist our customers – ensuring maximum uptime and reliability. And with offices in North America, Asia and Europe, Belden can respond globally.

#### System Performance

If Belden designs it, we guarantee performance – period. We are committed to ensuring world-class signal connectivity and to significantly improve your operational up-time. All Belden components are "designed" to deliver optimum performance: from connectors, to cable, to routers and switches. Based on this comprehensive product portfolio, we have the necessary industrial solutions DNA to deliver reliability.

For more information on our service and support offering, including our warranties, please go to the Belden web site at [www.belden.com/industrial](http://www.belden.com/industrial) to locate a Belden sales representative near you.

## The Lumberg Automation™ Brand Sets the Standard for Quality, Reliability and Service.

### About Our Solutions

Today, more than ever, manufacturing productivity depends upon seamless data communication and automation systems. Lumberg Automation has assembled one of the most diversified portfolios for industrial connectivity and distributed I/O systems for control applications.

With the advancements in technology and improved machine designs, industrial controls, such as sensors, actuators, safety light curtains, pushbutton switches and the like are moving closer to the application.

### Our Enclosure~less™ Concept

The Enclosure~less concept from Lumberg Automation addresses these applications with an entire suite of industrial hardened connectivity and distributed I/O products.

Enhanced environmental characteristics, modular designs, plug-and-play electronics with quick-disconnect designs are all integrated to increase speed of installation, decrease troubleshooting and maintenance while reducing the overall complexity of the control application. These products provide the optimal solution in machine and equipment design and offer excellent opportunities and benefits to OEMs, system integrators, and end users alike.

### Easing the Design Process

Our system approach leads to decreased time and money to develop complete integrated connectivity solutions. Using our Enclosure~less concept is one of the most effective ways to dramatically reduce the design time.

### Re-Useable Solutions

OEM's now have access to a set of standard products designed around the concept that everything is pluggable and interchangeable.

Having the flexibility to re-configure or expand an existing system without worrying about customization is made possible with our Enclosure~less concept. Most importantly, our products are re-usable and can be adapted to future designs or merely put back on the shelf for future use.

### Improved Installation Time with Less Mistakes

A recent study by a group of European manufacturers concluded that Enclosure~less assembly costs save as much as 30 percent over conventional installation methods.

These savings are realized through not only the Enclosure~less concept, but by the technology that is being employed. With a modular design approach and plug-and-play electronic features, less time will be spent running down errors or replacing parts from incorrect wiring.

### Trouble-Shooting is Simplified

Troubleshooting circuits can be a long process, especially when one is dealing with several hundred termination points.

Many of our products have integrated LED function indicators which provide a visual notification that a circuit is functioning properly.

By using products that have integrated LED functions, mechanics and engineers alike can quickly isolate and resolve the problem.

### Testing Made Simple

OEMs can cost-effectively build and pre-test a machine at their facility, disassemble and transport it to an end user's plant knowing that everything has been tested. This is primarily made possible through the reduction of wiring terminations throughout the system, which makes testing a much simpler and quicker process.

### Reliability is Maximized

Enclosure~less™ solutions can minimize wiring errors because wiring is pre-manufactured with quick-disconnect features. With less manual wiring involved, there are fewer points of failure.

Some studies suggest that a large portion of system failures come from installation rather than part failures. The decrease in errors associated with pre-manufactured wiring leads to an increase in the overall reliability of the control system.

In the end, this helps speed installation and commissioning, maintenance, troubleshooting, and ultimately boosts a plant's production.

### Maintenance/Repair Time is Reduced

Maintenance technicians and operators no longer need to access the control panel since much of the maintenance and troubleshooting can be done outside.

With the simplicity of wiring layout and connections, end users can efficiently isolate problems and replace a starter or I/O locally, rather than sorting through a complex panel. The result is significantly easier troubleshooting and shorter Mean-Time-To-Repair (MTTR).

### Floor Space at a Premium

Control cabinets can occupy a substantial amount of the production floor. The Enclosure~less™ concept dramatically reduces the need for that real estate, allowing companies to leverage more of their facility.

Industries like semiconductor and pharmaceutical manufacturing have realized the benefits of the On-Machine approach for years, as their clean-room space is at a premium.

Maintenance Costs.

## DeviceNet Introduction

### Common Industrial Protocol

**DeviceNet™** is part of the CIP protocol family. CIP stands for "Common Industrial Protocol". It is the platform for several communication protocols including DeviceNet, EtherNet/IP and CompoNet, as well as protocol enhancements for safety applications (CIP Safety) and motion control (CIP Motion).

DeviceNet™ is a fieldbus system for the direct connection of sensors and actuators in the field (e.g. proximity switches, motor starters, valves, etc.). DeviceNet™ originated in the North-American market and is presently used worldwide in all areas of plant automation.

**DeviceNet™** is based on the **CAN** specifications (Controller Area Network). However, unlike CAN it is restricted in functionality for easier implementation.

### About Lumberg Automation DeviceNet Products

To ensure the best application of DeviceNet in the decentralized sector, components must meet maximum electromechanical demands. DeviceNet components from Lumberg Automation offer maximum protection to the electronic system by the material used for the housing and sealing technology. The modules are equipped with either 7/8" or M12 connectors for the bus connection.

### Technical Data

**Transmission media** The individual stations are generally connected via a hybrid cable to transmit data (according to RS485) and for power supply (module electronics and sensors). It is constructed of 2 twisted and shielded pairs of wires contained inside another 360° shielding. There are four standardized types of cable:

- **THICK Cable** - sometimes called Trunk Cable
- **MID Cable**
- **THIN Cable** - sometimes called Drop cable
- **Type V Cable** - used for Tray Rated Cable (TC) applications

DeviceNet Module depicted with 7/8" bus connection and terminating resistor.

### Network Topology

Line structure with drop lines. The trunk line is terminated by resistors on both ends; the drop lines do not require a terminating resistor.

### Bus Access

DeviceNet is a multi-master system. The communication between the participants can be implemented in various modes:

- **Polled I/O Message Connection:** The data of the slaves is cyclically polled by the master (masterslave method).
- **Explicit Message Connection:** Acyclic communication between master and slave e.g. for parameterization.
- **Bit Strobed I/O Message Connection:** (broadcast) The master simultaneously sends a message to all slaves and the slaves send their input information back.
- **Change of state / Cyclic Message Connection:** In the change-of-state mode the slave automatically sends its current data to the master in case of a change at the input. In the cyclic message mode the slave sends the applicable input information at regular, predefined intervals (e.g. every 25 ms).

# Be Certain with Belden

Modes can be set individually for each slave. The CSMA/BA process is applied to avoid telegram collisions on the bus. It ensures that messages of high priority (e.g. input data telegrams) are transmitted before messages of low priority (e.g. parametric data).

### Number of Participants

64 nodes (including master)

### Admissible Transmission Rates and Line Lengths

Depending on the transmission rate (Baud rate) the admissible cable lengths (main and drop lines) change as specified in Table 1: Admissible transmission rates and line lengths.

Transmission Rate	125 kbit/s	250 kbit/s	500 kbit/s
Max. Trunk line using "THICK Cable"	500 m (1,640 ft.)	250 m (820 ft.)	100 m (328 ft.)
Max. Trunk line using "MID Cable"	300 m (984 ft.)	250 m (820 ft.)	100 m (328 ft.)
Max. Trunk line using "THIN Cable"	100 m (328 ft.)	100 m (328 ft.)	100 m (328 ft.)
Max. Trunk line using "Type V Cable"	420m (1,378 ft.)	200 m (656 ft.)	100 m (328 ft.)
Max. drop length	6 m (20 ft.)	6 m (20 ft.)	6 m (20 ft.)
Max. cumulative drop length	156 m (512 ft.)	78 m (256 ft.)	39 m (128 ft.)

Table 1: Admissible transmission rates and line lengths

### Bus Cycle Time

The bus cycle time depends on the following important factors – among others:

- Number of participants
- The relevant amount of data of the individual slaves
- Type of communication
- Transmission rate

### Configuration of the Nodes

The individual participants are configured via EDS files (Electronic Data Sheet) which are provided by the manufacturer for each slave. The EDS files for the Lumberg Automation bus modules can be obtained through [www.lumberg-automationusa.com](http://www.lumberg-automationusa.com).

### Addressing

Addressing is implemented via software or rotary address switches. Software addressing can be implemented via addressing tools or the master. The modules are integrated consecutively into the network and automatically checked / tested to determine whether another participant is on the bus with the same address. If that is the case, the participant deactivates itself. If the test is negative, the unit can be addressed via the master.

### Diagnostic System

With DeviceNet, the diagnostic message is transported via additional input bytes (status bytes) which are added to the input data Lumberg Automation compact I/O modules are using one status byte. In addition LED's on the modules make it easy to locate an error.

### Product Characteristics

- Especially suitable for robotic applications (resistance to torsion).
- Very good resistance to oils, coolants and lubricants as well as emulsions.
- Suitable for use in C-Tracks.
- Very good resistance to flying weld slag (e.g. unfinished constructions).
- Very good resistance to acids, lye and chemical cleaning agents.
- Very good electromagnetic resistance (EMC) and shielded systems.
- Very good vibration and shock resistance.
- UL approved.
- UL/CSA approved.

##### Environmental

Degree of protection	IP 67
Operating temperature range	-10°C (+14°F) to +60°C (+140°F)

##### Mechanical

Weight	190 g
Housing material	PBT

##### Bus system

Transmission rate	<b>DeviceNet</b> max. 500 kBaud
Address range	0–63 dec
Rotary address switches	0–63 dec
Default address	63 dec

##### System power supply

Rated voltage	24 V DC
Voltage range	11–30 V DC
Power consumption	60 mA
Reverse polarity protection	yes

##### Input power supply

Voltage range min.	<b>Us</b> (U <sub>System</sub> - 1.5 V)
Sensor current	100 mA (at Tamb 30°C) per socket
Short circuit-proof	yes
Indication	LED green

##### Inputs

Rated input voltage	<b>Type 3 acc. to IEC 61131-2</b> 24 V DC
Channel type N.O.	p-switching
Number of digital channels	max. 8
Channel status indicator	LED yellow per channel
Diagnostic indication	LED red per channel

##### Included in delivery/accessories

Dust covers M8	2 pieces
Attachable labels	10 pieces

**NOTE:** EDS-files can be downloaded from our website  
[http://www.beldensolutions.com/en/Service/Downloadcenter/Software\\_Lumberg/index.phtml](http://www.beldensolutions.com/en/Service/Downloadcenter/Software_Lumberg/index.phtml)

#### Part Number

0930 DSL 651

The application of these products in harsh environments should always be checked before use.  
 Specifications subject to alteration.

## DeviceNet I/O Modules with 8-Digital Inputs and 8-Digital Outputs

0930 DSL 650

### 8 IN / 8 OUT (universal)

DeviceNet device with 8 digital I/O channels, channels can be used universally as inputs or outputs, M8 socket, 3 poles, rotary switches for addressing, M12 bus connection, M12 actuator supply.

### Bit Assignment

Bit	7	6	5	4	3	2	1	0
-----	---	---	---	---	---	---	---	---

#### M8 Input

Byte 0	8	7	6	5	4	3	2	1
--------	---	---	---	---	---	---	---	---

#### Diagnostic

DIA-Byte	S8	S7	S6	S5	S4	S3	S2	S1
----------	----	----	----	----	----	----	----	----

S1...8: Socket Status 1...8

#### M8 Output

Byte 0	8	7	6	5	4	3	2	1
--------	---	---	---	---	---	---	---	---

### Diagnostic Indication

LED	Indication	Condition
1...8	yellow	channel status
1...8	red	periphery fault
Us	green	sensor/system power supply
Ul	green	actuator power supply
MS	green	device is ready for operating
(Module status)	green flashing	wrong configuration
	red	unrecoverable fault
	red flashing	recoverable fault
	red/green flashing	self test is running
NS	green	online, communication with PLC
	green flashing	online, no communication with PLC
	red flashing	time-out state of one or more I/O connections
	red	failed communication device, BUS-OFF Status, duplicate MAC-ID

### Pin Assignment

Bus connection M12	Actuator supply M12	Input/Output M8	
<p>1 = Drain 2 = 24 V<sup>1</sup> 3 = GND (0 V)<sup>1</sup> 4 = CAN_H 5 = CAN_L housing = earth</p>	<p>1 = +24 V<sup>2</sup> 2 = +24 V<sup>3</sup> 3 = GND (0 V)<sup>2</sup> 4 = GND (0 V)<sup>3</sup> 5 = earth</p>	<p>1 = +24 V 3 = GND (0 V) 4 = In</p>	<p>1 = system: galvanically separated to sensors/actuators 2 = actuators 3 = sensors</p>

# Be Certain with Belden

## DeviceNet I/O Modules with 8-Digital Inputs and 8-Digital Outputs

0930 DSL 650

### Technical Data

#### Environmental

Degree of protection IP 67  
 Operating temperature range -10°C (+14°F) to +60°C (+140°F)

#### Mechanical

Weight 200 g  
 Housing material PBT

#### Bus system

Transmission rate max. 500 kBaud  
 Address range 0–63 dec  
 Rotary address switches 0–63 dec  
 Default address 63 dec

#### System power supply

Rated voltage 24 V DC  
 Voltage range 11–30 V DC  
 Power consumption 60 mA  
 Reverse polarity protection yes

#### Input power supply

Us (U<sub>System</sub> - 1.5 V)  
 Sensor current 100 mA (at T<sub>amb</sub> 30°C) per socket  
 Short circuit-proof yes  
 Indication LED green

#### Inputs

Type 3 acc. to IEC 61131-2  
 Rated input voltage 24 V DC  
 Channel type N.O. p-switching  
 Number of digital channels max. 8  
 Channel status indicator LED yellow per channel  
 Diagnostic indication LED red per channel

#### Output power supply

Rated voltage 24 V DC  
 Voltage range 19–30 V DC  
 Reverse polarity protection yes/antiparallel diode  
 Indication LED green

#### Outputs

Rated output current 0.5 A per channel  
 Short circuit-proof yes  
 Max. output current 4 A per module  
 Overload-proof yes  
 Number of digital channels max. 8  
 Channel type N.O. p-switching  
 Channel status indicator LED yellow per channel  
 Diagnostic indication LED red per channel

#### Included in delivery/accessories

Dust covers M8 2 pieces  
 Attachable labels 10 pieces

### Technical Data

#### Environmental

Degree of protection IP 67  
 Operating temperature range -0°C (+32°F) to +60°C (+140°F)

#### Mechanical

Weight 570 g  
 Housing material PUR

#### Bus system

Transmission rate max. 500 kBaud  
 Autobaud yes  
 Address range 0–63 dec  
 Rotary address switches 0–63 dec  
 Default address 63 dec

#### Electronics power supply

Rated voltage 24 V DC  
 Voltage range 11–30 V DC  
 Power consumption max. 80 mA  
 Reverse polarity protection yes  
 Indication LED green

#### Input power supply

Voltage range min. (U<sub>System</sub> - 1.5 V)  
 Sensor current max. 800 mA  
 Short circuit-proof yes  
 Indication LED green

#### Inputs

Rated input voltage 24 V DC  
 Signal state "1" 11–30 V  
 Signal state "0" -3–5 V  
 Input current at 24 V 10 mA  
 Channel type N.O. p-switching  
 Number of digital channels 16  
 Channel status indicator LED yellow per channel

#### Included in delivery/accessories

Dust covers M12 2 pieces  
 Attachable labels 10 pieces

#### Communication modes

Polled I/O message connection  
 Change of state/ cyclic message connection  
 Explicit message connection

#### Electronics power supply

Rated voltage 24 V DC  
 Voltage range 11–30 V DC  
 Power consumption max. 80 mA  
 Reverse polarity protection yes  
 Indication LED green

#### Output power supply

Rated voltage 24 V DC  
 Voltage range 19–30 V DC  
 Potential separation present  
 Reverse polarity protection yes/antiparallel diode  
 Indication LED green

#### Outputs

Rated output current 2 A per channel  
 Short circuit-proof yes  
 Max. output current 12 A  
 Overload-proof yes  
 Number of digital channels 8  
 Channel type N.O. p-switching  
 Channel status indicator LED yellow per channel  
 Diagnostic indication LED red per channel

#### Included in delivery/accessories

Dust covers M12 2 pieces  
 Attachable labels 10 pieces

#### Communication modes

Polled I/O message connection  
 Change of state/ cyclic message connection  
 Explicit message connection

**NOTE:** EDS-files can be downloaded from our website

## DeviceNet I/O Modules with 16-Digital Outputs

### 16 OUT

DeviceNet device with 16 digital outputs (0.5 A) to connect standard actuators, combined M12 socket, rotary switches for addressing, M12 bus connection, 7/8" actuator supply.

### Bit Assignment

Bit	7	6	5	4	3	2	1	0
<b>Diagnostic: Input</b>								
<b>Byte 0</b>	-	-	-	-	-	-	ASC	UVA
<b>M12 Output</b>								
<b>Byte 0</b>	8A	7A	6A	5A	4A	3A	2A	1A
<b>Byte 1</b>	8B	7B	6B	5B	4B	3B	2B	1B

ASC: Actuator short-circuit  
UVA: Undervoltage actuator

### Diagnostic Indication

LED	Indication	Condition
1...8 A/B	yellow	channel status
1...8 A/B	red	actuator short-circuit / actuator overload
Us	green	actuator power supply
Ul	green	system power supply
MS	green	device is ready for operating
(Module status)	green flashing	incorrect or incomplete configuration
	red	unrecoverable fault
	red flashing	recoverable fault
	red/green flashing	self test is running
NS	green	online, communication with PLC
	green flashing	online, no communication with PLC
	red flashing	time-out state of one or more I/O connections
	red	failed communication device, BUS-OFF Status, duplicate MAC-ID

### Pin Assignment

Bus connection M12	Actuator supply 7/8"	Output M12
<ul style="list-style-type: none"> <li>1 = Drain</li> <li>2 = 24 V<sup>1</sup></li> <li>3 = GND (0 V)<sup>1</sup></li> <li>4 = CAN_H</li> <li>5 = CAN_L</li> </ul>	<ul style="list-style-type: none"> <li>1 = earth</li> <li>2 = +24 V</li> <li>3 = GND (0 V)</li> </ul>	<ul style="list-style-type: none"> <li>1 = n.c.</li> <li>2 = OUT B</li> <li>3 = GND (0 V)</li> <li>4 = OUT A</li> <li>5 = earth</li> </ul>

### DeviceNet I/O Modules with 16-Digital Outputs

0930 DSL 114

#### Technical Data

##### Environmental

Degree of protection	IP 67
Operating temperature range	-0°C (+32°F) to +60°C (+140°F)

##### Mechanical

Weight	570 g
Housing material	PUR

##### Bus system

Transmission rate	max. 500 kBaud
Autobaud	yes
Address range	0–63 dec
Rotary address switches	0–63 dec
Default address	63 dec

##### Electronics power supply

Rated voltage	24 V DC
Voltage range	11–30 V DC
Power consumption	max. 80 mA
Reverse polarity protection	yes
Indication	LED green

##### Output power supply

Rated voltage	24 V DC
Voltage range	19–30 V DC
Potential separation	present
Reverse polarity protection	yes/antiparallel diode
Indication	LED green

##### Outputs

Rated output current	0.7 A per channel
Short circuit-proof	yes
Max. output current	11.2 A
Overload-proof	yes
Number of digital channels	16
Channel type N.O.	p-switching
Channel status indicator	LED yellow per channel
Diagnostic indication	LED red per channel

#### Included in delivery/accessories

Dust covers M12	2 pieces
Attachable labels	10 pieces

#### Communication modes

Polled I/O message connection  
Change of state/ cyclic message connection  
Explicit message connection

#### System power supply

Rated voltage 24 V DC  
 Voltage range 11–30 V DC  
 Power consumption 90 mA  
 Reverse polarity protection yes

#### Input power supply

**US**  
 Voltage range 19–30 V DC  
 Sensor current 200 mA (at Tamb 30°C) per socket  
 Short circuit-proof yes  
 Indication LED green

#### Inputs

**Type 3 acc. to IEC 61131-2**  
 Rated input voltage 24 V DC  
 Channel type N.O. p-switching  
 Number of digital channels max. 16  
 Channel status indicator LED yellow per channel  
 Diagnostic indication LED red per socket

#### Output power supply

**UL**  
 Rated voltage 24 V DC  
 Voltage range 19–30 V DC  
 Potential separation present  
 Reverse polarity protection yes/antiparallel diode  
 Indication LED green

#### Outputs

Rated output current 1.6 A per channel  
 Short circuit-proof yes  
 Max. output current 9 A (12 A\*) per module

\* Test proven and approved under the following conditions:

- looped through System/Sensorpower supply max. 2.5 A
- Power supply cable STL 204 (5 x 1.00 mm<sup>2</sup>)
- Operating temperature range max. 40°C

Overload-proof yes  
 Number of digital channels max. 16  
 Channel type N.O. p-switching  
 Channel status indicator LED yellow per channel  
 Diagnostic indication LED red per socket

#### Included in delivery/accessories

Dust covers M12 4 pieces  
 Attachable labels 10 pieces

## Be Certain with Belden

Regarding the details in this catalog: Alterations may have been made to the product after the editorial deadline for this publication, namely 06/01/2010. The manufacturer reserves the right to alter the construction and form, manufacture different shades and amend the scope of delivery during the delivery period insofar as the alterations and differences are acceptable to the buyer while allowing for the seller's interests. Insofar as the seller or the manufacturer uses signs or numbers to mark the order or the ordered item, no rights may be derived from this alone. The illustrations may also contain accessories and special equipment which are not part of the mass-produced scope of delivery. Color differences are attributable to technical aspects of the printing process. This publication may also contain types and support services that are not made available/rendered in some countries. The information/details in this publication merely contain general descriptions or performance factors which, when applied in an actual situation, do not always correspond with the described form and may be amended by way of the further development of products. The desired performance factors shall only be deemed binding if these are expressly agreed on conclusion of the contract. This brochure will be used internationally. However, comments on statutory, legal, and fiscal provisions and effects only apply to the Federal Republic of Germany at the time of the editorial deadline for this publication. Please consult your pertinent seller about the provisions and effects that apply to your country and regarding the latest bidding version.
